

## **evopark and Parkamo start cooperation**

### Joint roll-out with focus on Germany

**Cologne/Munich, November 4, 2020** - The technology service providers evopark and Parkamo are starting a cooperation. The aim is to offer drivers more touchless parking and payment options in German car parks. The cooperation starts with the integration of Parkamo into evopark's platform 'mobility CONNECT' at the end of this year. mobility CONNECT is an open, manufacturer-independent mobility platform and acts as an interface between mobility providers and parking operators.

They are known as digital pioneers in the parking industry. evopark is an expert for Software as a Service solutions for parking operators and mobility providers. The young company Parkamo offers a new type of app, which gives users better access to free parking spaces. The Parkamo app enables car drivers to compare the prices of different providers, check availability and then use connected car parks touchless and cashless.

"Thanks to evopark we can further expand our network of parking facilities" says Katharina Wagner, CEO of Parkamo. "By joining mobility CONNECT, we offer parking operators new opportunities to increase the popularity and capacity utilisation of their parking facilities in these challenging times". The cooperation is also a strategically important step for the Cologne-based technology service provider evopark. "We are looking forward to integrating Parkamo, an up-and-coming mobility service provider, into our network," emphasises Henk de Bruin, Managing Director of evopark. "We will perfectly combine our expertise and further promote digital parking in Germany". The companies aim to add numerous additional car parks to the mobility CONNECT network in 2021. Many renowned mobility providers and parking operators with facilities in over 50 cities in Germany, Finland, the UK and the Netherlands are already partners of the platform.

About evopark

evopark is a Cologne-based company that was founded in 2014 as a start-up with the aim to significantly simplify parking for drivers. Today evopark is known as digital pioneer of the German parking industry and focuses on digital end-to-end products for parking operators and mobility providers. evopark has developed various digital parking solutions for B2B partners. Its solutions help to increase the online visibility and popularity of car park services for the end customer. They support car park operators in digitising their paper-based processes and enable them to offer new innovative services. Since 2018 evopark has been part of the Scheidt & Bachmann Group, an internationally active system house and leading provider of parking solutions, fare collection systems, fuel retail solutions and signalling systems. Jointly the companies offer digital solutions that cover the entire customer journey of parking.

About Parkamo

Parkamo combines the inventory of both professional and private providers in one app and is like Booking.com for parking. Currently, Parkamo has already integrated eight parking apps, including Easypark, Parkster and ParkNow. It is already possible to park via Parkamo in 20 countries and about 4380 cities throughout Europe. Car park operators and their infrastructure providers are also among the partners. With every parking transaction Parkamo Green Parking donates a contribution to certified climate friendly projects.

Parkamo was founded in 2019 by the Swedish company builder EPTI. CEO of Parkamo is Katharina Wagner. The head office is located in Munich.
